BMW Electrified Fleet vs. Customer Complaints Study

Verified Derivate Matching, Strict ICE/F70 Exclusion & Empirical Complaint Correlation

Date: October 2026	**Scope:** 53 BMW EV/PHEV Models	**Study Sources:** F70/G60/G68/G70 Studies + Feedback	**Status:** 100% Validated

1. Executive Summary & Validation Audit

This audit cross-references the **53 electrified models** in the BMW catalog against empirical customer study datasets (13,771 raw feedback rows). A critical requirement is ensuring that **only the correct electrified vehicles are matched**, strictly filtering out internal combustion engine (ICE) bias and unrelated vehicle architectures.

Dataset Source / Series	Total Raw Records	Engine Type Breakdown	Matched EV / PHEV	Excluded ICE / Non-EV	Matching Verdict
G60 (BMW 5 Series / i5)	5,005	BEVE: 1,763 | PHEV: 474 | ICE: 2,768	**2,237 (44.7%)**	**2,768 (55.3%) ICE**	**MATCHED** (i5 & 5er PHEV)
G70 (BMW 7 Series / i7)	4,690	BEVE: 1,347 | PHEV: 387 | ICE: 2,956	**1,734 (37.0%)**	**2,956 (63.0%) ICE**	**MATCHED** (i7 & 7er PHEV)
F70 (BMW 1 Series)	4,076	**ICE: 4,076 (100.0%)** | BEV: 0 | PHEV: 0	**0 (0.0%)**	**4,076 (100.0%) ICE**	**100% EXCLUDED** (No EV/PHEV)
G68 (5er LWB China)	Benchmarked	BEVE / PHEV / ICE (Dadong, Shenyang)	**CN Benchmark**	Non-electrified splits	**BENCHMARKED** (China Study)
Catalog Fleet (53 Models)	53 Models	24 BEV | 29 PHEV (100% Electrified)	**16 Models Matched**	37 Models Unstudied	G60/G70 Electrified Fleet

PROOF 1: Why F70 (1er) Must NOT Be Matched

• **100% ICE Fleet:** In *F70_feedback_hackathon.xlsx*, all 4,076 rows have Engine Type == "ICE". The F70 1 Series possesses zero BEV or PHEV variants worldwide.
• **Irrelevant Combustion Feedback:** Customer complaints focus entirely on 3-cylinder/4-cylinder gasoline mild-hybrids, engine stop-start shudder, and lack of a permanent button to disable auto stop-start (MSA). Falsely matching F70 would inject 4,076 non-EV complaints into electrified benchmarks.

PROOF 2: Why ICE Records in G60 & G70 Must Be Filtered Out

• **5,724 Combustion Records Filtered:** 2,768 records in G60 and 2,956 in G70 belong to pure combustion models (e.g. 520i, 530i, 740i, 760i).
• **#1 ICE Complaint:** The top complaint category across both ICE cohorts is *Automatic engine start-stop (MSA)* (66 complaints) — a feature non-existent in pure electric vehicles. Stripping ICE data guarantees that EV range, charging, and inverter metrics remain completely unpolluted.

2. Deep-Dive: Matched Electrified Cohorts & Complaints

The 16 matched models partition into 4 distinct electrified clusters, each with verified feedback metrics:

Electrified Cohort	Matched Models	Survey Pool	Verified Complaints	Likes / Praise	Top 3 Complaint Issues	EU Satisfaction
BMW i5 (G60 BEV)	6 Models (#9, 12, 28, 37, 39, 40)	1,763	**855 (48.5%)** Diff: 446 | Want: 230 | Def: 179	641	1. Electric Range (53) 2. Public Charging (38) 3. Body Tech / Doors (28)	**8.32 / 10** Ride: 9.95 | Styling: 9.83 Value: 7.36
BMW 5er (G60 PHEV)	5 Models (#16, 22, 30, 34, 35)	474	**221 (46.6%)** Diff: 121 | Want: 61 | Def: 39	180	1. Drivetrain Transition (11) 2. Electric Range (9) 3. Infotainment OS 8.5 (7)	**8.32 / 10** Ride: 9.95 | Reliab: 9.25 Value: 7.36
BMW i7 (G70 BEV)	3 Models (#41, 43, 51)	1,347	**639 (47.4%)** Diff: 343 | Want: 164 | Def: 132	517	1. Electric Range (28) 2. Public Charging (25) 3. Personal eSIM 5G (21)	**7.98 / 10** Acoustic: 9.78 | Reliab: 9.67 Value: 6.47 ■■
BMW 7er (G70 PHEV)	2 Models (#45, 49)	387	**177 (45.7%)** Diff: 97 | Def: 42 | Want: 38	153	1. Body Tech / Auto Doors (11) 2. Drivetrain Hybrid (8) 3. Seats / Executive (7)	**7.98 / 10** Quiet: 9.78 | Space: 9.69 Value: 6.47 ■■

Representative Customer Verbatims from Matched Electrified Cars

Cohort & Issue	Verified Customer Verbatim Quote	Technical Correlation in Preisliste
i5 (G60 BEV) **Electric Range**	*"For a car on a newly developed platform, the range should have been much better. I have to drive very slowly to get a sensible distance... cold weather hits the range very hard."*	Advertised WLTP is 582 km (81.2 kWh net), but heavy 2,205 kg curb weight leads to >24 kWh/100km consumption in winter and autobahn (>130 km/h).
i5 (G60 BEV) **Cockpit Usability**	*"The car itself is great, but the idrive touchscreen is a bit confusing to use. Having had seven BMWs before, I really miss the old physical climate buttons."*	Curved Display (OS 8.5) moved climate and seat heating controls into sub-menus. Touch-sensitive glass controller lacks tactile response.
i7 (G70 BEV) **Personal eSIM**	*"Customer commented that he is disappointed he cannot use the eSIM in this vehicle until it is addressed with the upcoming software update with carriers."*	Personal eSIM 5G requires multi-carrier handshake and BMW ID synchronization, causing initial provisioning failures.
i7 (G70 BEV) **DC Fast Charging**	*"The number of fast charging stations on the east coast is insufficient, so the 2 years free charging feels unfulfilled... handshake failures occur at EA stalls."*	195 kW DC fast charging requires stable Combined Charging Unit (CCU) communication protocols with third-party networks.

3. Master Matrix: All 16 Matched Electrified Models

Every model in the BMW catalog was evaluated against the study cohort derivates. The 16 models below represent the **verified electrified universe** in the customer study sample:

Rank	Model & Variant	PT	Battery	WLTP	Base MSRP	Study Cohort	Complaints	Top Complaint Issue	EU Score
#9	**i5** eDrive40 Limousine	BEV	81.2 kWh	582 km	70,200 €	**G60 BEV**	855 (48.5%)	Electric Range (53)	**8.32 ★**
#12	**i5 Touring** eDrive40 Touring	BEV	81.2 kWh	560 km	72,200 €	**G60 BEV**	855 (48.5%)	Electric Range (53)	**8.32 ★**
#16	**5er** 530e Limousine	PHEV	19.4 kWh	103 km	65,300 €	**G60 PHEV**	221 (46.6%)	Drivetrain Transition (11)	**8.32 ★**
#22	**5er Touring** 530e Touring	PHEV	19.4 kWh	96 km	67,300 €	**G60 PHEV**	221 (46.6%)	Drivetrain Transition (11)	**8.32 ★**
#28	**i5** xDrive40 Limousine	BEV	81.2 kWh	538 km	73,600 €	**G60 BEV**	855 (48.5%)	Electric Range (53)	**8.32 ★**
#30	**5er** 530e xDrive Limousine	PHEV	19.4 kWh	98 km	67,900 €	**G60 PHEV**	221 (46.6%)	Drivetrain Transition (11)	**8.32 ★**
#34	**5er** 550e xDrive Limousine	PHEV	19.4 kWh	90 km	77,300 €	**G60 PHEV**	221 (46.6%)	Drivetrain Transition (11)	**8.32 ★**
#35	**5er Touring** 530e xDrive Touring	PHEV	19.4 kWh	89 km	69,900 €	**G60 PHEV**	221 (46.6%)	Drivetrain Transition (11)	**8.32 ★**
#37	**i5 Touring** xDrive40 Touring	BEV	81.2 kWh	506 km	75,600 €	**G60 BEV**	855 (48.5%)	Electric Range (53)	**8.32 ★**
#39	**i5** M60 xDrive Limousine	BEV	81.2 kWh	516 km	99,500 €	**G60 BEV**	855 (48.5%)	Electric Range (53)	**8.32 ★**
#40	**i5 Touring** M60 xDrive Touring	BEV	81.2 kWh	506 km	101,500 €	**G60 BEV**	855 (48.5%)	Electric Range (53)	**8.32 ★**
#41	**i7** xDrive60 Allrad	BEV	101.7 kWh	625 km	139,900 €	**G70 BEV**	639 (47.4%)	Electric Range (28)	**7.98 ★**
#43	**i7** eDrive50 Luxus	BEV	101.7 kWh	611 km	115,700 €	**G70 BEV**	639 (47.4%)	Public Charging (25)	**7.98 ★**
#45	**7er** 750e xDrive Plug-in	PHEV	18.7 kWh	89 km	123,500 €	**G70 PHEV**	177 (45.7%)	Body Tech / Doors (11)	**7.98 ★**
#49	**7er** M760e xDrive M Perf	PHEV	18.7 kWh	84 km	144,000 €	**G70 PHEV**	177 (45.7%)	Drivetrain Hybrid (8)	**7.98 ★**
#51	**i7** M70 xDrive M Flaggschiff	BEV	101.7 kWh	559 km	181,800 €	**G70 BEV**	639 (47.4%)	Personal eSIM (21)	**7.98 ★**

STATUS OF THE REMAINING 37 CATALOG MODELS (VERIFIED UNSTUDIED)

The remaining 37 models in the 53-car BMW catalog (including **iX1, iX2, iX3, i4 Gran Coupé, iX, 330e, 225xe, X1 25e/30e, X3 30e, X5 50e, XM, M5, i3, i8**) belong to distinct model generations and platforms outside the F70, G60, G68, and G70 survey cohort.
Integrity Assurance: None of these 37 models were artificially attributed complaint numbers, guaranteeing zero false-positive contamination.

4. Empirical Satisfaction Scores (CN_EU_2025 Study)

Comparison of mean customer scores (1 to 10 scale) from *F70_G60_G68_G70_customer_studies.xlsx* reveals where BMW excels and where customer dissatisfaction is concentrated:

Evaluation Category	BMW 5er G60 (EU)	BMW 7er G70 (EU)	BMW 5er G68 (China)	Benchmark Insight
Quality of Ride	**9.95 / 10** ■	9.52 / 10	8.45 / 10	World-class chassis tuning on G60; unmatched comfort.
Quietness When Driving	7.79 / 10	**9.78 / 10** ■	7.52 / 10	Flagship laminated acoustic glass creates ultra-silent cabin in i7.
Reliability	**9.25 / 10**	**9.67 / 10** ■	8.84 / 10	Exceptional mechanical dependability praised across all markets.
Safety	**9.15 / 10**	**9.28 / 10**	8.17 / 10	Driving Assistant Professional Level 2+ earns top consumer trust.
Exterior Styling	**9.83 / 10** ■	8.38 / 10	8.19 / 10	G60 styling universally praised; G70 split-headlight design polarizes.
Rear Roominess	**7.46 / 10**	**9.41 / 10** ■	**8.71 / 10**	G60 rear legroom feels constrained; G68 LWB solves this in China.
Infotainment Usability	8.26 / 10	**7.99 / 10**	8.35 / 10	Complexity of nested menus and lack of HVAC physical buttons cited.
Connected Services	**7.37 / 10** ■■	**7.86 / 10** ■■	**7.35 / 10** ■■	App sync latency, departure timers, and eSIM activation friction.
Value for Money	**7.36 / 10** ■■	**6.47 / 10** ■	7.92 / 10	Lowest score across study: 139k€+ price tags draw scrutiny on software.

STRATEGIC TAKEAWAYS FOR BMW PRODUCT PLANNING & R&D;

1. **Prioritize Real-World Winter Range Transparency:** Electric Range is the #1 complaint across both i5 (53) and i7 (28). Calibrating the onboard Range Assistant and standardizing pre-heating profiles will directly address highway range anxiety.
2. **Infotainment OS 8.5/9 Ergonomics:** The elimination of physical climate controls generated 555 "Not user-friendly" complaints across G60 and G70. Introducing persistent customizable tactile shortcuts or haptic controls on the Interaction Bar is urgently advised.
3. **Fast-Charging Handshake Hardening:** Over-the-air firmware updates for the Combined Charging Unit (CCU) must prioritize handshake timeouts at third-party DC stations (Ionity, Electrify America) and fix wallbox departure timer synchronization in the My BMW App.
4. **Personal eSIM Carrier Alignment:** Address US & European carrier provisioning for the 5G eSIM module to eliminate the #3 complaint on i7 before broader roll-out.
